

## Municipality of GAZI BABA

Mr. Vladimir Bozhinovski

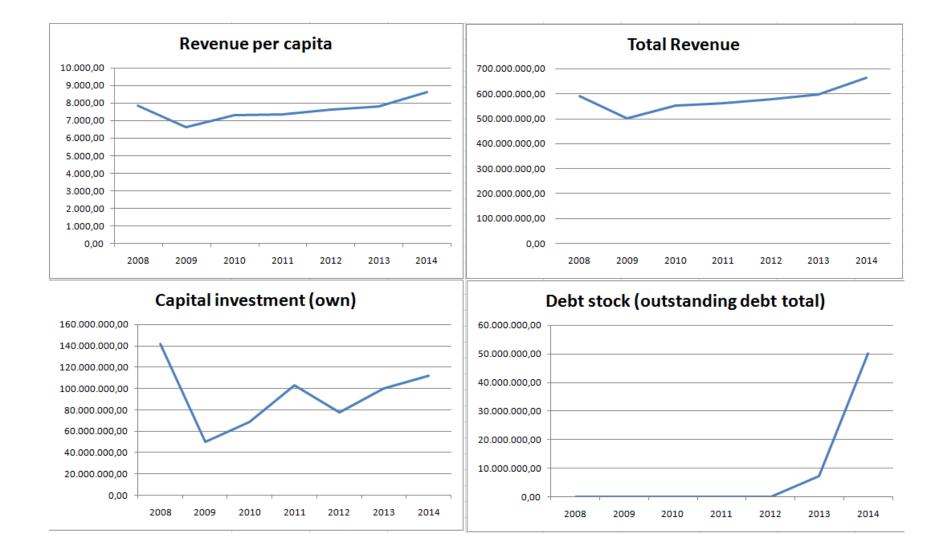

| Population | Area   | Density | Population as % in Macedonia | Part of City of |
|------------|--------|---------|------------------------------|-----------------|
| 76,458     | 92 km² | 831     | 3.69%                        | Skopje          |

# MFSA experience

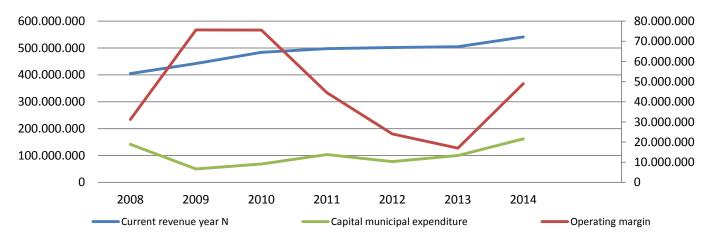

- 1. WB MFSA tool is used in MGB since 2012 and influenced the financial decision making during the years.
- 2. The experience with the MFSA is extremely positive and useful for:
  - Municipal finance capacity diagnostic clearer picture of the financial position, budget structure, predictions and trends of the municipality.
  - Identification of financial areas of great importance and potential that can be significantly improved (ie. local taxes, donations, operating expenses, etc.).
  - Creating an Improvement Action Plan that helps us improve the municipal financial planning and management.

## Main Financial trends - MGB

# **Generic accounting framework**

# **Financial structure of MGB**

### **Revenue structure**

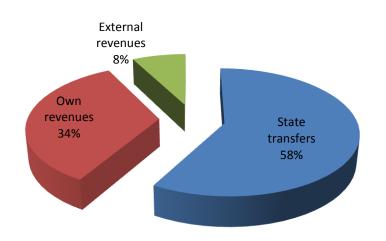

- state transfers
- own revenues

Realization 2014

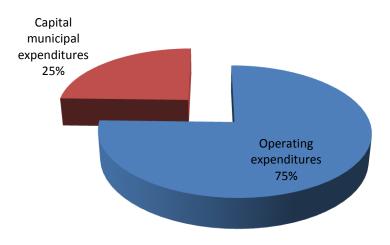

external revenues

### **Expenditure structure**

- capital expense
- operating expenditures

Realization 2014

# MGB action plan

#### Main findings about Gazi Baba are:

- Revenue enhancing needs Increase effectiveness in tax collection (increasing number of tax payers and updating the data base).
- Lowering expenditures Decreasing the current expenses for goods and services of the administration and reallocating them to more productive usage finance capital investment activities (rationalization).
- Enhancing fiscal capacity Multi-year fiscal planning, expenditure policy and budgeting (fiscal capacity, fiscal effort and creditworthiness). Improvement in planning of future municipal activities and strategies. Enhance the image and transparency to the citizens and creditors.
- Enhancing External funding Increased revenues from donations, grants and other external sources in the municipality budget.

# **MFSA** benefit

#### Benefits from the MFSA tool:

- Integrates analysis and information in one comprehensive platform;
- Provides a clearer financial picture of the municipality;
- Efficiency Defines the financial trends that are later used in decision making process.
- Improved overview and monitoring of the capital investment realization;
- Increased transparency Helps local government to inform central government and citizens about the financial situation.
- Breaks the working barriers between technical and financial department;
- Platform for discussions with financial institutions and external donors for access to external funding;
- Starting point for preparation of UA;
- Knowledge transfer (vertical and horizontal).

# Main goal

 MFSA helps us in our main goal as local government, which is to be more flexible and effective in solving the real problems for the citizens in the Municipality of Gazi Baba.

## Thank you for your attention!
